TYPE OF LANDMARK

3/4"x 30" IRON BAR WITH ALUMINUM CAP.

BEARINGS ARE REFERENCED TO

ASSUMED NORTH.

Describe any record evidence, monument evidence, testimonial evidence or any other material evidence you considered and whether the monument was found or restored through acceptance of an obliterated evidence location.

In 1984 Phil Scholze found a stone at this corner and tied it off. The local landowners had apparently known of this section corner stone for quite some time. I dug at the location but found only stone remnants. Was it plowed out? Scholze's iron pipe offsets were still in. I set an iron bar with a cap at the corner using the pipes. The iron bar is down 18". I set a hub with a tack over the iron bar. In digging for the stone I went down 40".

Describe or show any material discrepancy between the location of the restored corner and that of the corner previously restored or reestablished.

None known.
