GRID NORTH AS PER SECTION DATA.

Describe any record evidence, monument evidence, testimonial evidence or any other material evidence you considered and whether the monument was found or restored through acceptance of an obliterated evidence location.

This corner was set on line and proportionately between the section corner to the West and the 1/16th corner to the East. At the Southwest corner of Section 29 we had previously found an original bearing tree and original line tree. At the S.1/16-S.E. $\frac{1}{4}$  of Section 29 we found the "mound of stone" called for by Middlebrook in his 1876 survey. The corner was monumented with an iron bar with cap in an old logging road. There was no sign of Middlebrook's bearing

Describe or show any material discrepancy between the location of the restored corner and that of the corner previously restored or reestablished.

NONE KNOWN.
