GRID NORTH AS PER SECTION DATA.

Describe any record evidence, monument evidence, testimonial evidence or any other material evidence you considered and whether the monument was found or restored through acceptance of an obliterated evidence location.

Uriah Briggs set a wood post for the original government corner in 1845. Middlebrook, the LaCrosse County Surveyor, found Briggs' corner in 1876. William Knower, the Vernon County Surveyor, found Briggs' corner in 1883 and 1888. We found both of the original bearing trees, still standing, one dead and the other dying. I reset the section corner using these trees and Briggs' calls. The corner fell at a very old four-way fence intersection location. I set a 30" Berntsen at the corner and mounded it

Describe or show any material discrepancy between the location of the restored with rocks. corner and that of the corner previously restored or reestablished.

NONE KNOWN.
